3M™ Scotchshield™ Automotive Security Films

Applied to turn your car into your castle.

- Protection from broken and flying glass
- Increased peace of mind with high end tear strength
- Superior protection against forced entry or burglary
- Blocking 99.9% of UV transmission to reduce fading

3M™ Scotchshield™ Automotive Security Films SAS 5, SAS 20, SAS 35, SAS 50, SAS Clear

We make your car your castle

Our Scotchshield Automotive Security Films are designed for the use on the interior surfaces of vehicle windows. They are composed of a transparent and a series of tinted weather stable Polyester films, a scratch resistant coating and a strong acrylic adhesive system. All products of this family have the German ABG approval.

Your benefits at a glance

- Enhance security
- Protect from injuries or damage caused by fragments of broken glass
- Increase resistance to vandalism, forced entry or smash and grab burglaries
- Increase privacy by shading up to 95%
- Reduce fading from UV light
- Reduce glare from blinding sunlight and headlights of following cars
- Less air conditioning – less fuel consumption
- Resist abrasion to keep the appearance of the film

Easy application by 3M partners

The SAS Series is intended for the use on the inside of automotive glazing. The films should be professionally applied by skilled, well-trained, 3M authorized installers. Windows can be considered operational after 24h.

Easy cleaning

Scotchshield Automotive Security Films may be cleaned after installation using ordinary automotive window cleaning agents and avoiding abrasive particles. Do not use rough sponges, clothes or brushes. Synthetic sponges, soft wipes or rubber squeegee cleaners are recommended.
